

Sperm A-1:
You are formed in the TESTICLE
(Testis).

Sperm B-1:
You are formed in the TESTICLE.
(Testis).

Sperm C-1:
You are formed in the TESTICLE
(Testis).

Sperm A-1:
You move to the EPIDIDYMIS to
mature.

Sperm B-1:
You move to the
EPIDIDYMIS to mature.

Sperm C-1:
You move to the
EPIDIDYMIS to mature.

Sperm A-1:
When EJACULATION occurs, you start
your journey by moving into the VAS
DEFERENS.

Sperm B-1:
When EJACULATION occurs, you start
your journey by moving into the VAS
DEFERENS.

Sperm C-1:
When EJACULATION occurs, you
start your journey by moving into
the VAS DEFERENS.

Sperm A-1:
You move by the
SEMINAL VESICLES
that provide you sugary food.

Sperm B-1:
You move by the
SEMINAL VESICLES
that provide you sugary food.

Sperm C-1:
You move by the
SEMINAL VESICLES
that provide you sugary food.

Sperm A-1:
You then move through the
PROSTATE GLAND that provides you
an alkaline protective fluid.

Sperm B-1:
You then move through the
PROSTATE GLAND that provides you
an alkaline protective fluid.

Sperm C-1:
You then move through the
PROSTATE GLAND that provides
an alkaline protective fluid.

Sperm A-1:
You then pass into the URETHRA
getting ready to leave the body.

Sperm B-1:
You then pass into the URETHRA
getting ready to leave the body.

Sperm C-1:
You then pass into the URETHRA
getting ready to
leave the body.

Sperm A-1:
You try to leave the body, but your
penis is wearing a condom, and you are
stopped.

Sperm B-1:
You weren't fully developed and don't
finish the journey. You are absorbed
into the body.

Sperm C-1:
You exit the penis and move into
the vagina and die because the
Ph balance is acid.

Sperm A-1:
Place your mover onto the condom in
the center board. Pick up another
sperm and continue as Sperm A-2.

Sperm B-1:
Place your mover onto the Testicle on
the center board. Pick up another
sperm and continue as Sperm B-2.

Sperm C-1:
Place your mover onto the Vagina
on the center board. Pick up
another sperm and continue as
Sperm C-2.

Sperm A-2:
You exit the penis and move into the
vagina and start swimming.

Sperm B-2:
You exit the penis and move into the
vagina and start swimming.

Sperm C-2:
You exit the penis and move
into the vagina and start swimming.

Sperm A-2:
Your tail moves you up toward the
CERVIX and the opening leading to the
UTERUS.

Sperm B-2:
Your tail moves you up toward the
CERVIX and the opening leading to the
UTERUS.

Sperm C-2:
Your tail moves you up
toward the CERVIX and the
opening leading to the UTERUS.

Sperm A-2:
You keep swimming and move through
the small opening in the CERVIX and
enter the UTERUS.

Sperm B-2:
You keep swimming and move through
the small opening in the CERVIX and
enter the UTERUS.

Sperm C-2:
You keep swimming and move
through the small opening in the
CERVIX and enter the UTERUS.

Sperm A-2:
You keep swimming and move into the FALLOPIAN TUBE on the LEFT.

Sperm B-2:
You keep swimming and move into the FALLOPIAN TUBE on the RIGHT.

Sperm C-2:
You keep swimming and move into the FALLOPIAN TUBE on the LEFT.

Sperm A-2:
There is no egg in this FALLOPIAN TUBE. You die and are absorbed.

Sperm B-2:
You've been in the FALLOPIAN TUBE for 2 – days. You run out of time.....die/absorbed.

Sperm C-2:
There is no egg in this FALLOPIAN TUBE. You die and are absorbed.

Sperm A-2:
Place your mover onto the Fallopian Tube on the center board.
(game over)

Sperm B-2:
Place your mover onto the Fallopian Tube on the center board.
(game over)

Sperm C-2:
Place your mover onto the FALLOPIAN TUBE on the center board. (game over)

Sperm D-1:
You are formed in the TESTICLE (Testis).

Sperm E-1:
You are formed in the TESTICLE (Testis).

Sperm F-1:
You are formed in the TESTICLE (Testis).

Sperm D-1:
You move to the EPIDIDYMIS to mature.

Sperm E-1:
You move to the EPIDIDYMIS to mature.

Sperm F-1:
You move to the EPIDIDYMIS to mature.

Sperm D-1:
When EJACULATION occurs, you start your journey by moving into the VAS DEFERENS.

Sperm E-1:
When EJACULATION occurs, you start your journey by moving into the VAS DEFERENS.

Sperm F-1:
When EJACULATION occurs you start your journey by moving into the VAS DEFERENS.

Sperm D-1:
You move by the SEMINAL VESICLES that provide you sugary food.

Sperm E-1:
You move by the SEMINAL VESICLES that provide you sugary food.

Sperm F-1:
You move by the SEMINAL VESICLES that provide you sugary food.

Sperm D-1:
You then move through the PROSTATE GLAND that provides you an alkaline protective fluid.

Sperm E-1:
You then move Through the PROSTATE GLAND that provides you an alkaline protective fluid.

Sperm F-1:
You then move Through the PROSTATE GLAND that provides you an alkaline protective fluid.

Sperm D-1:
You then pass into the URETHRA getting ready to leave the body.

Sperm E-1:
You then pass into the URETHRA getting ready to leave the body.

Sperm F-1:
You then pass into the URETHRA getting ready to leave the body.

Sperm D-1:
You exit the penis and move into the vagina and start swimming.

Sperm E-1:
You exit the penis and move into the vagina and start swimming.

Sperm F-1:
You exit the penis and move into the vagina and start swimming.

Sperm D-1:
Your tail moves you up toward the CERVIX and the opening leading to the UTERUS.

Sperm E-1:
Your tail moves you up toward the CERVIX and the opening leading to the UTERUS.

Sperm F-1:
Your tail moves you up toward the CERVIX and the opening

Sperm D-1:

You keep swimming and move through the small opening in the CERVIX and enter the UTERUS.

Sperm D - 1:

You keep swimming and move into the FALLOPIAN TUBE on the RIGHT.

Sperm D - 1:

You continue to swim further into the FALLOPIAN TUBE.

Sperm D - 1:

You are surrounded by other sperm, all trying to find the EGG/OVA!

Sperm D - 1:

But wait...there is a problem. There is a coating on the egg keeping you from entering!!

Sperm D-1

Place your mover onto the Fallopian Tube on the center board.
(game over)

Sperm E -1:

You keep swimming and move through the small opening in the CERVIX and enter the UTERUS.

Sperm E-1:

You keep swimming and move into the FALLOPIAN TUBE on the RIGHT.

Sperm E-1:

You continue to swim further into the FALLOPIAN TUBE.

Sperm E-1:

You are surrounded by other sperm, all trying to find the EGG/OVA!

Sperm E-1:

You find the OVA/EGG...You are the first one here! You fertilize the egg!

Sperm E-1:

You begin the transfer of DNA to the EGG/OVA!
(game over)

Sperm F-1:

You are attacked by white blood cells because you are a foreign cell...die/absorbed.

Sperm F-1:

Place your mover onto the Vagina on the center board. Pick up another sperm and continue as Sperm F-2.

Sperm F-2

Your tail moves you up toward the CERVIX and the opening leading to the UTERUS.

Sperm F-2:

You keep swimming and move into the FALLOPIAN TUBE on the LEFT.

Sperm F-2:

There is no egg in this FALLOPIAN TUBE. You die and are absorbed.

Sperm F-2:

Place your mover onto the Fallopian Tube on the center board. (game over)
